Empowering Farmers. Together.

We are Nigeria's 1st Digital Agriculture Platform focused on connecting farm sponsors with real farmers in order to increase food production while promoting youth participation in Agriculture

Farmcrowdy is an agric-tech platform that gives Nigerians the opportunity to participate in Agriculture by selecting the kind of farms they want to sponsor. We use the sponsor's funds to secure the land, engage the farmer, plant the seeds, insure the farmers and farm produce, complete the full farming cycle, sell the harvest and then pay the farm sponsor a return on their sponsorship. While this farm process is ongoing, the farm sponsors are able to keep track of the full-cycle by getting updates in text, pictures and videos.
